

Cross cut tester

The cross-cut adhesion test is a very rapid and simple method for the assessment of the adhesion of single and multi-coat systems with this sturdy instrument, in the lab as well as on site. The cross-cut adhesion tester can be used on flat and curved surfaces, and even on substrates such as aluminum or plastics.

Features

- Reproducible test results
- Available with 1, 1.5, 2 and 3 mm blade spacing
- Economic, with a robust and ergonomic design
- Knives easily exchangeable
- Supplied in a case complete with brush, magnifier and tape

Technical details

Dimensions 160 x 26 x 80 mm
Weight 0.3 kg
