

# Handroller

Handrollers are used to apply pressure sensitive adhesive tapes to sample plates for further testing.

There is a rubber coated roller according to FINAT, weighing 2 kg and with a width of 50 mm, as well as a rubber coated roller according to AFERA, ISO, EN, ASTM and PSTC, weighing 2 kg (4.5 lbs) and with a width of 45 mm.

These rollers have a special construction that prevents the roller touching the table when not in use.

## Features

- According to FINAT, PSTC, AFERA, ISO, EN or ASTM standard
- Apply tapes in a consistent way

## Technical details

Diameter	85 ± 2.5 mm
Cover	Rubber Shore A 80±5
Width	FINAT 50 ± 1 mm PSTC/AFERA 45 ± 1 mm
Weight	FINAT 2 ± 0.05 kg PSTC/AFERA 2.04 ± 0.045 kg

## Standards

PSTC 101 · FINAT 2.1 · AFERA 5001 ·  
ASTM D3330 · EN 1939 · EN ISO
